How to configure our maven repository for use

Maven `~/.m2/settings.xml` configuration on mac/linux stations

```
<settings xmlns="http://maven.apache.org/POM/4.0.0"
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
  xsi:schemaLocation="http://maven.apache.org/POM/4.0.0
    http://maven.apache.org/xsd/settings-1.0.0.xsd">

  <localRepository/>
  <interactiveMode/>
  <usePluginRegistry/>
  <offline/>
  <pluginGroups/>
  <servers>
  </servers>
  <mirrors>
    <mirror>
      <id>bb-public</id>
      <url>https://nexus.solutionary.tech/content/groups/public</url>
      <mirrorOf>*</mirrorOf>
    </mirror>
  </mirrors>
  <proxies/>
  <profiles>
    <profile>
      <activation>
        <activeByDefault>true</activeByDefault>
      </activation>
      <repositories>
        <repository>
          <id>bb-public</id>
          <url>https://nexus.solutionary.tech/content/groups/public</url>
          <releases>
            <enabled>true</enabled>
          </releases>
          <snapshots>
            <enabled>true</enabled>
          </snapshots>
        </repository>
      </repositories>
    </profile>
  </profiles>
  <activeProfiles/>
</settings>
```

Notes

- mirror is optional and can be skipped if you use another mirror of maven central repository or don't want use mirror for maven central repository at all
- if you already have own configured `settings.xml` configuration and only want to add our repository - just copy **bb-public** repository from this configuration to repositories section to you configuration
